**RE:** Capital Reserve Transfer Request

---

Various sanitary sewerlines and manholes in ECSD No. 1 have been recommended for rehabilitation by the Division of Sewerage Management. Specifically, approximately 51,000 lineal feet of cured-in-place pipe (CIPP) lining and follow-up manhole improvements are proposed for infrastructure tributary to French Road.

It is recommended that capital reserves be used to fund the recommended sewer and manhole rehabilitation work. The work is estimated at \$1,800,000, and hence a total amount of \$2,000,000 is requested to account for contingencies. This work would ultimately be funded through Capital Project C.26100.

Enclosed is a resolution recommending the allocation of capital reserves for these improvements. I will be present at the next Board meeting to discuss this matter. Thank you for your consideration.
