EMS Agency Health Insurance/Worker's Compensation Coverage Agreement

The Erie County Health Department, Division of EMS (ECEMS) offers NYS CFR, EMT, AEMT, and Paramedic EMS certification courses. A requirement for course completion is that students must assess and treat live patients in approved clinical settings, which includes hospital ERs, ambulance services, urgent cares, hospital inpatient areas, etc. Another requirement for course completion is successfully performing physical and practical skills, such as lifting, establishing IVs, handling and administering medications, etc. These requirements are defined in detail in the course syllabus and policies for each EMS course.

While unlikely, it is possible that a student may become injured while performing these duties. Because of this, students must maintain private health insurance or worker's compensation insurance throughout the EMS course they are enrolled in. Neither ECEMS nor its clinical partners will be financially responsible for any medical expenses the student accrues from injuries that occur while performing duties required for course completion.

The EMS Agency can choose to satisfy this requirement for their employees/members that are ECEMS students by agreeing to cover all medical expenses as a result of injuries that occur while performing duties required for course completion through its worker's compensation insurance and completing this agreement. The EMS agency does not need to provide this coverage to their employees/members if they choose to have them use their private health insurance instead. If that is the case, then the EMS agency does not need to complete this agreement.

EMS Agency Name: _____

EMS Agency Student Name Covered: _____

EMS Agency Chief Officer Name: _____
