

ERIE COUNTY DIV. OF FIRE SAFETY – TRAINING GUIDELINES				
SOG#	SUPERSEDES	CREATED	LAST UPDATED	REVISION#
1010	---	03/01/2002	04/11/2022	0
SECTION		AREA		
Training		Student Personal Protective Equipment		

1010.01 Scope:

This training procedure establishes guidelines for dealing with student personal protective equipment (PPE)

1010.02 Authority:

The Fire Chief from the departments training will attest that all of the students that are participating in live fire training have had annual gear inspections and that their gear is currently in compliance with code and free from defect. Employees of Erie County Fire Safety are authorized to restrict a student's activities during state or county training courses or evolutions if they observe or otherwise are made aware of the student using personal protective equipment that is not safe, appropriate or not in compliance with applicable OSHA standards; or are not using personal protective equipment necessary for safely participating in the prescribed training evolution.

This does not require that instructors inspect the student's equipment; it merely authorizes them to restrict activities once the instructor is aware of the situation.
