

DIVISION OF HOMELAND SECURITY AND EMERGENCY SERVICES

# Training Announcement

**Fire Prevention  
and Control**

**Full Description:** This Interoperable Communications Radio Course will define communications and help you identify basic radio system components. You will understand different radio system types and learn the proper use of the Radio System. There will be hands on proper use of a portable two-way radio and we'll explain Erie County Fire Radio Policies & Procedures. You'll understand how the current Erie County Radio System is configured and works. We'll also explain where to find additional resources and let you know how to access them. All class participants are asked to bring a **Department Portable with them to class.**

**Designed for:** All First Responders
