Weathering the Storm: Understanding Dangerous Weather Events

Full Description: This class will enhance participants' ability to monitor weather conditions and recognize potentially hazardous weather and flooding situations. Topics include the fundamentals of meteorology, severe convective weather, winter weather, hydrology and flooding, weather observation, forecasting tools and techniques, an overview of National Weather Service (NWS) products, and how and where to obtain reliable weather information.

Designed for: Designed for both first responders and the general public, this course provides practical knowledge to improve situational awareness, preparedness, and decision-making during hazardous weather events.

Course Length: 09:00 to 13:00 (4 hours)

Course Number: WXEM2602

Course Location: Erie County Training & Operations Center

Training Date: Tuesday September 29, 2026

Prerequisites: none

Instructor: Judith Levan

Registration Dates: No later than 9/15/26
