FENTANYL
test strips

why test drugs for fentanyl?

- **fentanyl increases risk of overdose**
- **fentanyl is very common in, heroin, cocaine, crack, meth, club drugs and pills from nonmedical sources**

how to use fentanyl test strips

1 put small amount of drug residue in a clean container or bag & add water 1/2 to 1 teaspoon of water

2 insert test strip hold at solid blue end, insert the wavy end in water and wait 15 seconds

3 remove and wait at least 5 minutes in full light look at the strip and count how many lines have appeared

Test Results

Negative
fentanyl is not detected

Positive
fentanyl is detected

⚠ **extremely high risk**

Invalid
re-test with a new strip

Stay Safe

no drug is completely safe and there is always a risk of overdose

use drugs with other people and take turns

go slow by taking small amounts and waiting in between use

Get Narcan (text for Narcan – 716-225-5473) and use it if there is an overdose

overdose is a medical emergency, call 911
