Priority	Focus Area (select one from drop down list)	Goal Focus Area (select one from drop down list)	Objectives through 2024	Disparities	Interventions	Family of Measures	By December 2023, we will have . . .	Implementation Partner <i>(Please select one partner from the dropdown list per row)</i>	Partner Role(s) and Resources
Prevent Chronic Diseases	Preventive care and management	Goal 1.1: Increase cancer screening rates	Erie County Department of Health Cancer Services will provide breast cancer and prostate cancer screening services.	High incidence of cancer rates among racial and ethnic minority populations by targeting community members who are uninsured or underinsured.	<i>Intervention:</i> Increasing community-wide services by collaborating with healthcare providers throughout the region.	Cancer screening services provided will be tracked by demographics such as race and ethnicity.	Services to underserved communities will have been increased.	Federally qualified health care center	Community and faith based organizations, Patient Voices Network and outreach staff throughout Erie County will provide referrals. Our hospital partners will provide screening services
Promote Healthy Women, Infants and Children	Perinatal & Infant Health	2.1: Increase Breast Feeding	Increase the initiation of breastfeeding for new mothers and expand availability of breastfeeding-friendly worksites.	Low rates of breastfeeding among racial and ethnic minorities which may influence rates of morbidity in these populations by targeting worksites that predominantly racial and ethnic minority staff.	<i>Intervention:</i> Increase support for breastfeeding in the workplace by recruiting and establishing additional designated Breastfeeding Friendly Worksites. <i>Intervention:</i> Provide education and promote public service messages around breastfeeding, prioritizing marginalized and underserved populations and communities.	Increase the percentage of infants who are exclusively breastfed in the hospital. Increase the percentage of infants enrolled in WIC who are breastfed at 6 months. Increase the number of breast-feeding friendly worksites.	New breast feeding friendly work sites will have been designated. Developed public messaging and education about the benefits of breastfeeding.	Hospital	Partner interventions: Catholic Health and Kaleida Health Systems will promote and provide lactation consultants to mothers at the birthing hospitals to increase the number of women who breastfeed exclusively while in the hospital
Promote Health Women, Infants and Children	Child and Adolescent Health	2.2: Reduce Dental Caries Among Children	Increase the number of children receiving preventative dental care.	Geographic areas with limited dental services available by providing education and access to preventative dental services in these areas.	<i>Intervention:</i> Increase delivery of evidence-based preventive dental services across key settings, including school-based and community-based primary care clinics, by recruiting additional pediatricians and family practitioners to incorporate the practice of applying varnish to the teeth of toddlers and children when they come for their well checkup, prioritizing marginalized and underserved populations and communities.	Number of community screenings, number of practitioners recruited and number of children receiving the service.	Recruited additional family practitioners and pediatricians and held community screening events.	Providers	Jericho Road, Neighborhood Community Health Centers, UB School of Dentistry. Dentist from these sites will provide oversite for ECDOH's Dental Hygienist ECDOH will provide supplies, conduct the community screenings, and conduct the public health detailing campaign.
Promote Well-Being and Prevent Mental and Substance Use Disorders Priority	Substance Use Disorders	3.1: Prevent opiates and other substance use disorder and deaths	Increase availability of Narcan and the number of people who can effectively respond to decrease the number of deaths due to overdose.	Increase in overdose deaths in minority populations.	<i>Intervention :</i> Increase availability of/access to overdose reversal (Naloxone) trainings to prescribers, pharmacists, and consumers.	Number of individuals trained, number of organizations trained and number of wall mounted emergency narcan kits are in the community.	We will have completed training individuals and distributed wall mounted Emergency Narcan kits.	Law Enforcement	Erie County Medical Examiner will track outcomes. Hospitals and behavioral health centers will aid in referrals and distribution. Erie County Opiate Epidemic Task Force, Western New York Response After Overdose (WNYRAO), Community of Peer Enrichment program (COPE), Law Enforcement and First Responders, Crisis Services will continue collaboration towards harm reduction.
Promote Well-Being and Prevent Mental and Substance Use Disorders Priority	Mental Health	3.2: Prevent Suicides	Reducing access to lethal means and increasing availability of mental health training.	Lack of access to mental health services.	<i>Intervention:</i> Create protective environments by reducing access to lethal means among persons at risk of suicide, improving the distribution plan for Firearms Safety and Time & Distance video, and increasing the number of safe storage places for firearms. <i>Intervention :</i> Conduct mental health first aid trainings to equip community members with the skills to connect individuals in mental distress to the help they need.	Number and means of suicides. Distribution of gun locks. Number of mental health first aid trainings and enrollees.	Distributed gun locks and administered firearm safety education. Conducted Mental Health First Aid trainings.	Community Organizations	Local firearms retailers provid gun locks. Behavioral health, VAWNY, Crisis Services will collaborate towards improving access to crisis management and educational opportunities. Medical Examiner's Office will track outcomes. Erie County Office of Health Equity will provide MHFA trainings.

Priority	Focus Area (select one from drop down list)	Goal Focus Area (select one from drop down list)	Objectives through 2024	Disparities	Interventions	Family of Measures	By December 2023, we will have . . .	Implementation Partner <i>(Please select one partner from the dropdown list per row)</i>	Partner Role(s) and Resources
Prevent Chronic Diseases	Preventive care and management	Goal 1.1: In the community setting, improve self-management skills for individuals with chronic diseases, including asthma, arthritis, cardiovascular disease, diabetes and prediabetes and obesity	To give Erie County residents the tools needed to improve their disease self-management skills and halt or slow the progression of a chronic disease with which they are living by expanding access to evidence-based, Stanford Chronic Disease Self-Management Program.	High rates of poor chronic disease outcomes among ethnic and racial minority populations.	<i>Intervention:</i> Increasing the number of evidence-based, Stanford Chronic Disease Self-Management (CDSM) delivered to disadvantaged communities and minority populations throughout Erie County. <i>Intervention:</i> Expand access to CDSM by developing and implementing a public health detailing campaign to encourage health care providers to refer to/ prescribe CDSM for individuals with chronic disease (arthritis, asthma, cardiovascular disease, diabetes, prediabetes, and obesity) whose conditions are not well-controlled with guidelines-based medical management alone.	Number of referrals made. Number of health care providers informed of evidence-based programs and number of health care providers who committed to referring patients to programs. Number of community members enrolled in evidence-based CDSMP, DSMP and DPP programs and the number of sessions facilitated by Erie County Staff.	The Public Health Detailing Plan will be ready to roll out. Staff will have been trained as peer leaders and will have facilitated at least one, 6-week Chronic Disease Self Management Program.	Hospital	Westen New York Integrated Care Collaborative will provide training and will assist in the development of the public health detailing plan. Kaleida Health and Catholic Health will host sessions in their facilities and provide referrals.
Prevent Chronic Diseases	Preventive care and management	Goal 1.2: Increase cancer screening rates	Erie County Department of Health Cancer Services will provide breast cancer and prostate cancer screening services.	High incidence of cancer rates among racial and ethnic minority populations by targeting community members who are uninsured or underinsured.	<i>Intervention:</i> Increasing community-wide services by collaborating with healthcare providers throughout the region.	Cancer screening services provided will be tracked by demographics such as race and ethnicity.	Services to underserved communities will have been increased.
