

IS LUNG CANCER SCREENING RIGHT FOR YOU?

Lung Cancer causes more cancer deaths than breast, prostate & pancreas combined,

- Yet, lung cancer screening rates are the lowest of any routine cancer screening.
- only 6% of those eligible have been screened for lung cancer.
- lack of lung cancer screening has caused too many lung cancer patients to go undiagnosed until they already have advanced and difficult-to-treat cancer.
- Lung cancer screening can save your life!

To be eligible for lung cancer screening individuals must meet the following criteria:

- Be between the ages of 50 and 80.
- Currently smoke or have quit within the past 15 years.
- Have a 20 or more pack-year smoking history ([Calculate pack years](#)).
- Do not have a history of lung cancer.

Lung Cancer Screening Options

Eddy is a **mobile lung cancer screening unit** outfitted with state-of-the-art screening technology. Thanks to New York State and Roswell Park Comprehensive Cancer Center, Eddy brings life-saving lung cancer screening to the New Yorkers who need it most, especially medically underserved populations. Patients can get a low-dose CT scan in just 30 seconds. Check the link below to see when Eddy will be near you.
