B. NYS County Summary:

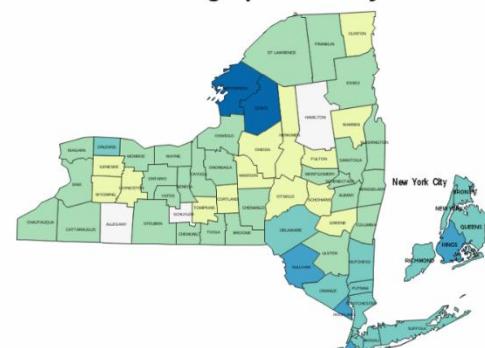

Influenza Geographic Activity

COVID-19 Geographic Activity

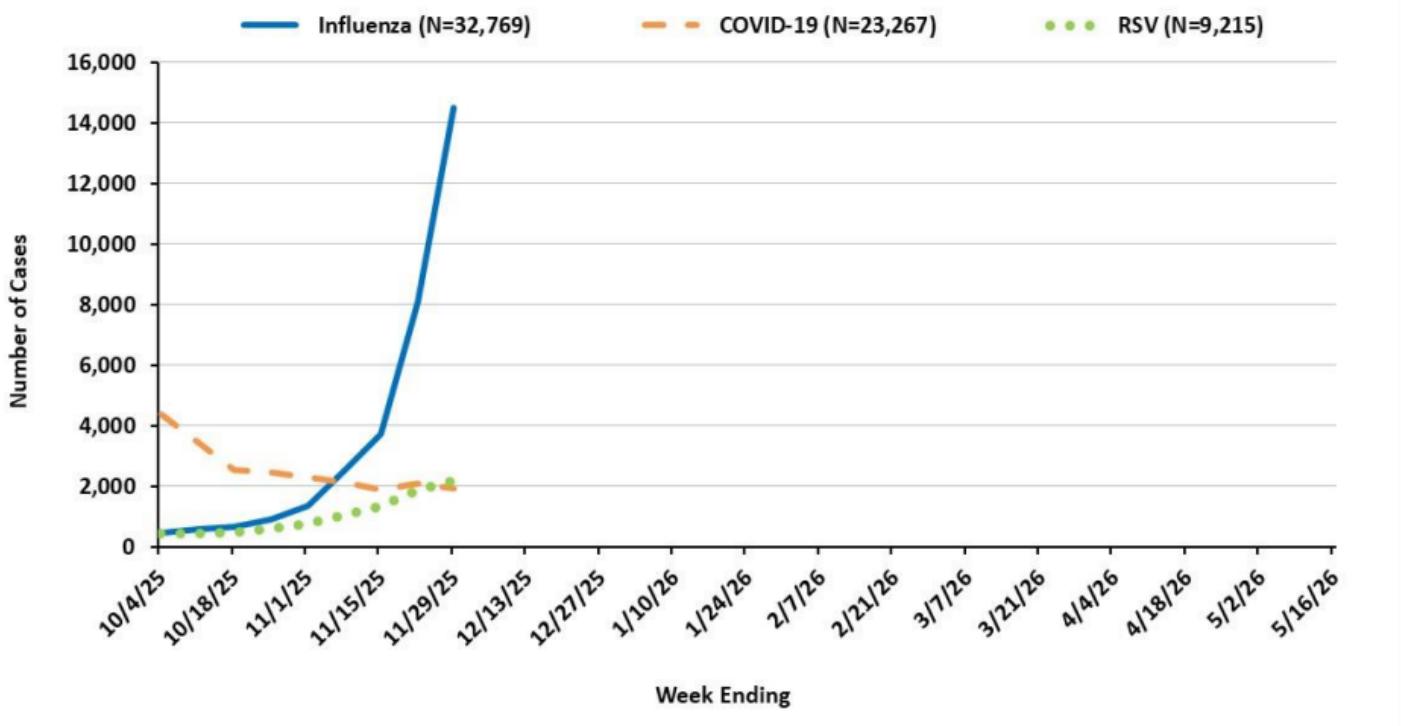

RSV Geographic Activity

- No cases reported this season
- Cases reported previously this season, but not this week
- 0.01 to 7.99 cases/100,000 population
- 8 to 19.99 cases/100,000 population
- 20 to 39.99 cases/100,000 population
- Greater than or equal to 40 cases/100,000 population

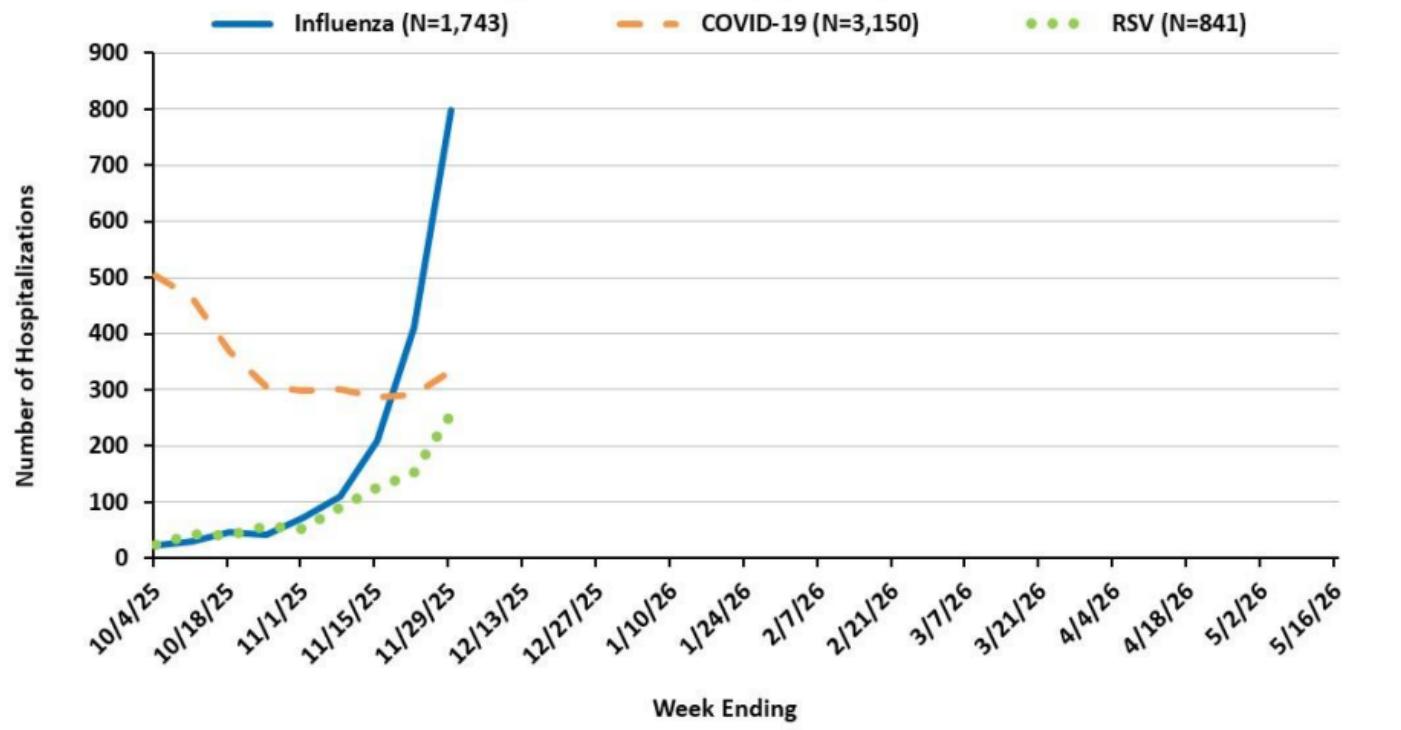

C. NYS – Laboratory-Confirmed Cases of Influenza, COVID-19, and RSV

Statewide Influenza, COVID-19, and RSV Laboratory-Confirmed Cases, Reported to NYSDOH, by Week, 2025-2026

D. NYS – Hospitalizations with Laboratory-Confirmed Influenza, COVID-19, or RSV

Statewide Hospitalizations with Laboratory-Confirmed Influenza, COVID-19, or RSV, Reported to NYSDOH, by Week, 2025-2026

Erie County Department of Health (ECDOH) Respiratory Surveillance

A. ECDOH Weekly Summary:

Influenza

- 195 laboratory-confirmed cases were reported this week. This is a 54% increase from the previous week.
- Of 195 positive laboratory-confirmed influenza reports, 190 were positive for influenza A and 5 were positive for influenza B.
- There have been 0 influenza-associated pediatric deaths reported to Erie County this season.

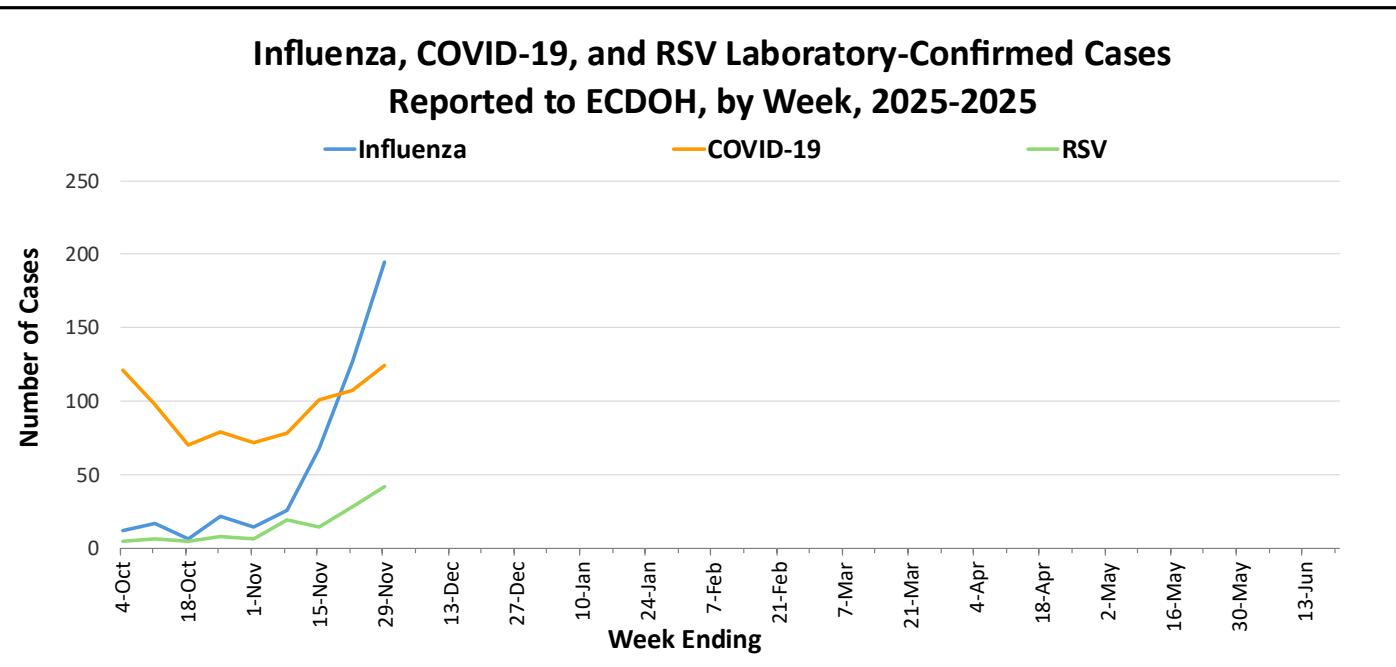

COVID-19

- 124 laboratory-confirmed cases were reported this week. This is a 16% increase from the previous week.
- There have been 0 COVID-19-associated pediatric deaths reported to Erie County this season.

RSV

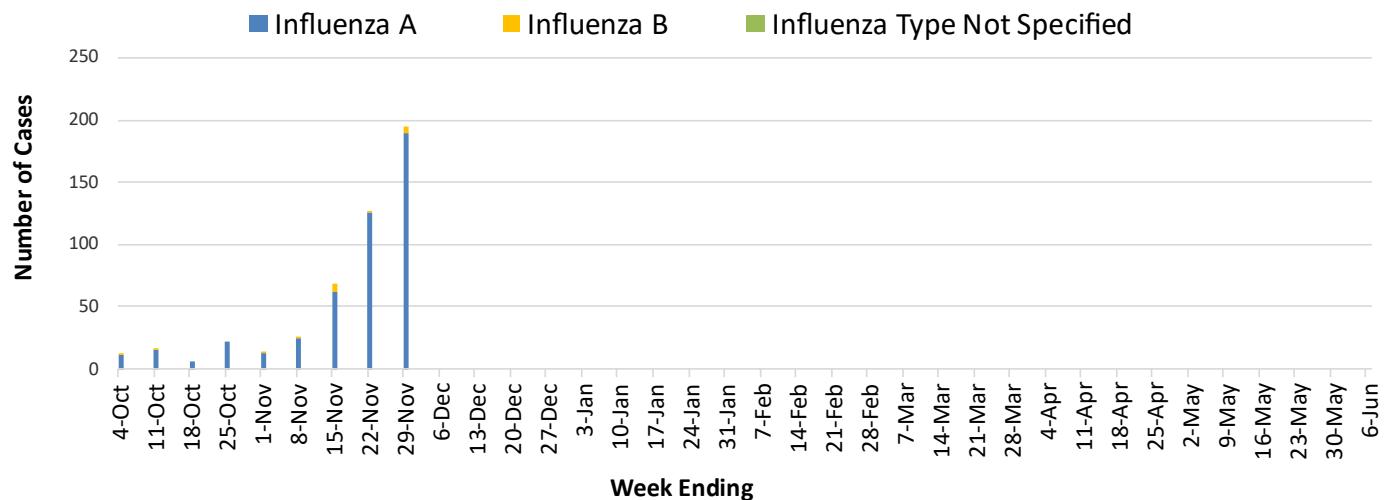

- 42 laboratory-confirmed cases were reported this week. This is a 50% increase from the previous week.
- There have been 0 RSV-associated pediatric deaths reported to Erie County this season.

B. Erie County – Laboratory-Confirmed Cases of Influenza, COVID-19, and RSV

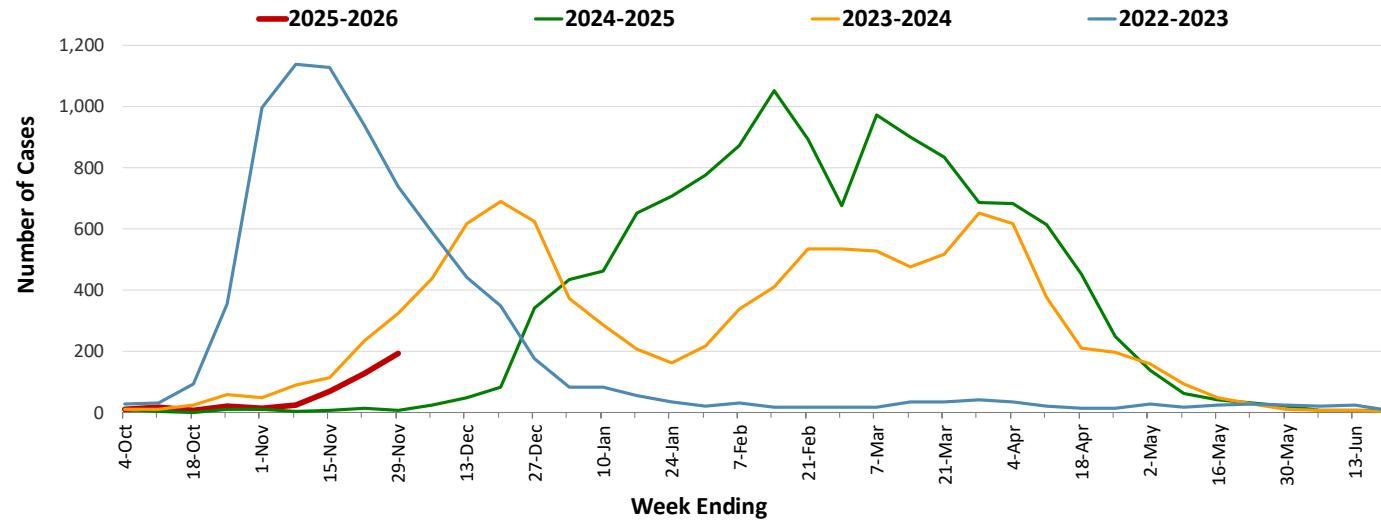

C. Erie County – Laboratory-Confirmed Cases of Influenza by Week

Laboratory-Confirmed Influenza Cases Reported to ECDOH, by Week, 2025-2026

D. Erie County - Laboratory-Confirmed Cases of Influenza by Season

Laboratory-Confirmed Influenza Cases Reported to ECDOH, by Season

Influenza Data Sources and Methods:

Reporting of laboratory-confirmed influenza is mandated under the New York State Sanitary Code (10NYCRR 2.10) and Public Health Law (PHL 2102). Full-service licensed clinical laboratories, and optionally, other laboratories, electronically report positive influenza laboratory test results via the NYSDOH Electronic Clinical Laboratory Reporting System (ECLRS). Influenza data reported to ECLRS is not intended to represent all influenza illnesses as clinical diagnoses, diagnoses based on testing in doctors' offices (e.g., rapid tests), and diagnoses based on serology are not required to be reported to NYSDOH. Despite these limitations, the data can provide useful situational awareness (e.g, trend) information during an influenza season.

ECDOH collects, compiles, analyzes information on influenza activity and generates this report weekly during the influenza season (October through the following May).
