C. NYS – Laboratory-Confirmed Cases of Influenza, COVID-19, and RSV

D. NYS – Hospitalizations with Laboratory-Confirmed Influenza, COVID-19, or RSV

Erie County Department of Health (ECDOH) Respiratory Surveillance

A. ECDOH Weekly Summary:

Influenza

- 95 laboratory-confirmed cases were reported this week. This is a 52% decrease from the previous week.
- Of 95 positive laboratory-confirmed influenza reports, 50 were positive for influenza A and 45 were positive for influenza B.
- There have been 0 influenza-associated pediatric deaths reported to Erie County this season.

COVID-19

- 98 laboratory-confirmed cases were reported this week. This is a 40% decrease from the previous week.
- There have been 0 COVID-19-associated pediatric deaths reported to Erie County this season.

RSV

- 96 laboratory-confirmed cases were reported this week. This is a 16% increase from the previous week.
- There have been 0 RSV-associated pediatric deaths reported to Erie County this season.

B. Erie County – Laboratory-Confirmed Cases of Influenza, COVID-19, and RSV

C. Erie County – Laboratory-Confirmed Cases of Influenza by Week

D. Erie County - Laboratory-Confirmed Cases of Influenza by Season

Influenza Data Sources and Methods:

Reporting of laboratory-confirmed influenza is mandated under the New York State Sanitary Code (10NYCRR 2.10) and Public Health Law (PHL 2102). Full-service licensed clinical laboratories, and optionally, other laboratories, electronically report positive influenza laboratory test results via the NYSDOH Electronic Clinical Laboratory Reporting System (ECLRS). Influenza data reported to ECLRS is not intended to represent all influenza illnesses as clinical diagnoses, diagnoses based on testing in doctors' offices (e.g., rapid tests), and diagnoses based on serology are not required to be reported to NYSDOH. Despite these limitations, the data can provide useful situational awareness (e.g, trend) information during an influenza season.

ECDOH collects, compiles, analyzes information on influenza activity and generates this report weekly during the influenza season (October through the following May).
