Influenza Data Sources and Methods:

ECDOH generates this report weekly the respiratory season (October through the following May) using data and information that is collected, compiled, and analyzed by NYSDOH.

Additional information about respiratory monitoring in New York State (NYS) is available from NYS Department of Health at https://health.ny.gov/diseases/communicable/respiratory_viruses/ and New York City (NYC) is available from the NYC Department of Health and Mental Hygiene website at https://www.nyc.gov/assets/doh/respiratory-illness-data/index.html#/. National respiratory surveillance data are available on the CDC's Respiratory Illness Data Channel website at: https://www.cdc.gov/respiratory-viruses/data/index.html.

The Electronic Clinical Laboratory Reporting System (ECLRS) provides laboratories that serve New York State with a single electronic system for secure and rapid transmission of reportable disease information to the New York State Department of Health (NYSDOH), county health departments, and the New York City Department of Health and Mental Hygiene (NYCDOHMH). Data presented in this report include information reported to NYSDOH and are subject to incomplete reporting and delays. Previously reported data are updated as delayed reports are received by NYSDOH.

Hospitals report weekly number of patients hospitalized with confirmed influenza, COVID-19, and RSV to the Survey Management and Response Tool (SMART).
