Service Contract Bid Specifications for an Integrated Pest Management Program for the control of Bed Bugs

Erie County Department of Public Works, Division of Buildings and Grounds, requires a vendor to provide monthly inspection and pest extermination services at various County facilities as listed in the enclosed specifications

This will be a two-year contract for the period November 1, 2017 through October 31, 2019.

ARTICLE I – GENERAL

1001 - The inspection and pest management services to be performed by the contractor under this specification shall consist of furnishing all material, parts, labor, tools, and equipment necessary to provide complete control of Bed Bugs as described herein.

1002 - Bidder is requested to quote price based on monthly inspections of all sites listed. Prior arrangements for inspections are to be scheduled at the mutual agreement of Department of Buildings and Grounds representative and the vendor

1002a- Must provide hourly time and material cost.

1003 - As part of this contract, vendor is to provide at no additional cost to the County: baits, traps (wind-up and glue), Bed Bug monitors and all necessary EPA / DEC listed and approved chemicals and pesticides

1004 – Contractor will provide all MSDS sheets to the Dept. of Buildings and Grounds for any chemicals or pesticides used in the elimination and control of Bed Bugs in county buildings.

1005 – The County reserves the right, upon (30) thirty days written notice, to terminate or suspend all or any part of the monthly services described herein when conditions or needs change, operation of a County facility is reduced or discontinued, or other similar circumstances take place. In the event of such termination or suspension, payments for monthly services shall be suspended without penalty. As such, if site conditions warrant, monthly service may be reinstated at the agreed upon monthly contract rate upon written notice from the Div. of Buildings and Grounds. Payments will be made only for that portion of monthly service rendered

ARTICLE II - COMPETENCY OF BIDDER

2001 - ~~The bidder shall have had a qualified service organization in active operation for a minimum of five (5) years~~ and be registered with the NY State DEC. The bidder shall have established Pesticide business registration and history of competent service experience in Bed Bug management as described in these specifications, and must have on its payroll sufficient qualified and certified personnel to guarantee satisfactory performance of this contract. Vendor will provide technicians that are NY State DEC Certified in Category 7A and 7F and follow Part 325 (latest revision) Rules and Regulations relating to application of pesticides.

2002 - The bidder shall submit a statement that includes at least three (3) specific locations that have been serviced by the bidder and the dates during which Bed Bug control service has been performed. Consideration will not be given to bids submitted by an individual, firm, or corporation who has established on former projects, either government or commercial, an unsatisfactory record of performance in connection with inspection, or extermination of pests as herein described. The County reserves the right to determine the competency of contractors being considered for the award of this contract. The County will take into consideration all factors, which are deemed pertinent to the satisfactory execution of this contract.

2003 - The successful bidder will be required to provide proof of insurance as per requirements of Erie County

ARTICLE III – PAYMENTS

3001 - Payments in the amounts stipulated in the contract shall be made monthly in arrears, upon completion of service and submission of specified written reports and detailed invoices.

ARTICLE IV – FAILURE TO COMPLY

4001 – In the event that the contractor fails to perform in accordance with these specifications, or violates any of the provisions hereof, the County of Erie may upon ten (10) days notice in writing to the contractor terminate this contract and engage the services of others to perform all work necessary. The cost of this work shall be at the contractor's expense.

ARTICLE V – SCOPE OF WORK

5001 – **ASSESSMENTS:** The work to be performed by the contractor under this specification shall consist of integrated pest management (IPM) and inspection services for commercial buildings as herein described. Vendor will take a pro-active approach for Bed Bug elimination on both interior and exterior areas in a low profile mode that does not draw undue attention to the service technicians. For the first (6) six months of this agreement the vendor will inspect, monitor, provide appropriate Bed Bug extermination service and assess all listed locations and provide a written report to the Deputy Commissioner of Buildings and Grounds suggesting a continuing program of Bed Bug control for each site. The initial assessment survey will be done at each location noting structural deficiencies, potential problem sites and approximate locations of monitor/rodent stations. The survey will be conducted by a registered sanitarian with American Institute of Baking credentials to ensure that the IPM program conforms to sanitation requirements and good pest management practices. The consulting sanitarian, after assessing the site, will discuss the particulars of the location with the certified pest management professional (CPMP). The CPMP will be responsible for monitoring activity, inspecting all sites, and providing the appropriate treatment. After the initial six-month assessment period, the Division of Buildings and Grounds will make determination for continued monthly service on a site-by-site basis. The vendor will provide a written assessment report every (6) six months thereafter for each location outlining progress made, current status of infestation and recommendations.

5002 – **WORKING HOURS:** Preventive maintenance and inspection work under these specifications shall be performed after normal working hours established for the County of Erie, when the building is unoccupied, during evenings, and on weekends unless otherwise approved and arranged beforehand.

5003 – **MONTHLY INSPECTIONS:** Building areas should be visually inspected a minimum of (1) one time per month with attention to interior areas such as food service and vending areas, restrooms, maintenance closets, basements, shops, and trash collection and dock areas. Visual inspection of exterior structure including potential problem areas and known problem areas for signs of Bed Bug activity. Inspect for structural deficiency and note on the written monthly report for each site to be submitted with invoice.

5004 – **EXCLUSION:** Vendor will report to County, areas that need attention to limit the entrance of Bed Bugs into structure.

5005 – **MONITORING:** Glue boards and Bed Bug monitors will be used to identify species, monitor activity and degree of infestation, if present. They are to be used in areas where they cannot be readily touched. Bed Bug scent induced traps are only a monitoring device and are not to be used for elimination, per the manufacturer.

~~5005a. Bed Bug dogs may be used for detection. Dogs must be certified for use in this field.~~

~~Proof of Certification must be submitted at time of bid.~~

5006 – **NON-PESTICIDE APPLICATIONS:** Growth regulators / inhibitors may be utilized in highly sensitive areas to interrupt growth cycles if they are low toxicity (LD50) factor. It is understood that they are not as effective on new infestations introduced into a structure, and can take as long as one year, according to manufacturer, to achieve effective reduction. Tamper-resistant bait packages hidden in Bed Bug harborages are to be placed according to label directions.

5007 – **NON-RESIDUAL APPLICATIONS:** To be used where and when absolutely necessary to preserve the structural sanitation, health and well-being of the working environment. Such materials used for target pest with the lowest LD50 factor and lowest vapor pressure, applied strictly according to label directions to minimize potential undesired exposure. All materials used are to be NY State DEC registered, EPA approved, and applied by a NYSDEC Certified technician only. (Pyrethrums, pyrethroids and synthetics are known allergens and can trigger allergic reactions in sensitive individuals. Their use should be limited).

Note: Any and all materials or service is to be performed when there is no personnel in the structure; or within the confines of the problem area – provided it can be sealed and secured for the appointed time of 24-48 hours; or as specified on the label (WHICHEVER IS GREATER, where and if possible; otherwise, an initial non-chemical approach, then only if deemed necessary by the NYSDEC certified technician, the least toxic approach.)

5008 – **RESIDUALS:** To be used when and where necessary as determined by the licensed NYSDEC certified technician to maintain sanitary and healthy conditions in the work environment and to be applied only according to label directions, specifications and limitations. Once the target Bed Bug has been identified, make a proper application with the proper dilution of a residual being the lowest toxicity (LD50) factor, lowest vapor pressure, and specifically labeled for the target insect. Applications made using crack and crevice treatments will use wettable powder, pressurized aerosol, or emulsifiable concentrate.

5009 – **DOCUMENTATION** An IPM logbook with copies of labels, material safety data sheets (MSDS), location site maps, journal entry sheets, and maintenance log sheets shall be kept with the building engineer at each location. The logbook shall be provided and maintained by the vendor. Logbook shall contain all qualifying documents to meet Federal EPA, NY State DEC and local requirements as well as copies of certificates of insurance, applicators licenses, and pest management reports documenting all work accomplished and quantity and type of products used. **It is the vendor's responsibility to maintain records and file annual reports as mandated by the Federal EPA and NY State DEC.**

5010 – **EMERGENCY SERVICE:** The contractor shall provide emergency service outside of normal established working hours for the trade on any day of the week, day or night, holidays included for problem infestations. The contractor shall provide a continuous telephone service where he can be reached twenty-four (24) hours, seven days each week, Sundays and holidays included in the event emergency service is required. Such emergency service is outside of the normal maintenance and inspection service specified in this contract and is to be billed separately at the appropriate established overtime rate with prior approval of the site Chief Engineer.

5011 – **ADDITIONAL WORK** – Any work required outside of the normal inspection and service specified herein, that was identified as being needed at time of inspection, may be completed with the prior approval of the site Chief Engineer. Such work to be billed separately with detail of labor hours.

*Please quote labor rate per hour to be charged for such service. Labor rate quoted to remain firm for the award period. (see Article VII, 7002, 7003)

ARTICLE VI – SPECIAL NOTICE, BUILDING RENOVATIONS

6001 – The vendor is hereby notified that the Department of Public Works has ongoing building renovations and modernizations in progress. Bidders are advised that certain buildings undergoing renovation during the contract period may be removed from the monthly IPM service requirement per Article I, Section 1005 and the monthly service charge will be suspended without penalty. At the conclusion of the renovation project, the vendor will upon written notice from the Division of Buildings and Grounds, resume monthly services per the terms of this specification, and the service charge reinstated.

COUNTY OF ERIE

MARK C. POLONCARZ
COUNTY EXECUTIVE

DIVISION OF PURCHASE

TO: ALL BIDDERS
FROM: James D. Kucewicz, Buyer
Erie County Division of Purchase
DATE: October 3, 2017
SUBJECT: ADDENDUM NO. 1 Erie County Bid #217 232-002
Pest Management Program

The attention of all bidders is directed to the following changes in the above bid

The initial assessment survey does not need to be done by a registered sanitarian, as is stated in section 5001 of the bid specifications

Section 5001 has been changed to read as follows

ARTICLE V – SCOPE OF WORK

5001 – ASSESSMENTS The work to be performed by the contractor under this specification shall consist of integrated pest management (IPM) and inspection services for commercial buildings as herein described. Vendor will take a proactive approach for Bed Bug elimination on both interior and exterior areas in a low profile mode that does not draw undue attention to the service technicians. For the first (6) six months of this agreement the vendor will inspect, monitor, provide appropriate Bed Bug extermination service and assess all listed locations and provide a written report to the Deputy Commissioner of Buildings and Grounds suggesting a continuing program of Bed Bug control for each site. The initial assessment survey will be done at each location noting structural deficiencies, potential problem sites and approximate locations of monitor/rodent stations. After assessing the site, the certified pest management professional (CPMP) will be responsible for monitoring activity, inspecting all sites, and providing the appropriate treatment. After the initial six-month assessment period, the Division of Buildings and Grounds will make determination for continued monthly service on a site-by-site basis. The vendor will provide a written assessment report every (6) six months thereafter for each location outlining progress made, current status of infestation and recommendations

ARTICLE VII - LOCATIONS, FREQUENCY, PRICING & PAYMENT

7001 Price to inspect and service all listed sites per requirements of these bid specifications. Monthly bid is based on an estimated use of (100) bait stations for the thirteen locations. Such work to be performed monthly (unless noted otherwise) during the award period. Bidders are advised to make arrangements for site visits prior to bidding, to become familiar with each facility.

NAME of BIDDER: Ashland Pest Control, Inc.

Addendum to
Bid No. 217232-002
Proposed Services Description

Summary: Months one to four
Inspection, fact finding, treatment as needed
Months five to six
Inspection, monitor, treat and summary report
Months seven to twelve
Inspection, monitor, treat and summary report

As per bid instructions and requests, the initial services for initial quarter is to inspect and monitor all occupied areas suspect of inhabiting bed bugs, installing monitors both non-lure and lure (SenSci). All monitors placed to be mapped to indicate location and for analysis. (All SenSci lures to be replaced minimally every quarter as per label.)

Inspection reports indicate results of inspections, recommendations and any deficiencies noted during monthly inspections. Any insects found reported to appropriate personnel indicating additional action required.

Bed bug treatment in areas noted positive for insects found during inspection with a residual product as indicated in bid (growth regulator as needed), labeled for bed bugs according to all restrictions and instructions. Reapplications after 30 days, or as product label indicates. Should a more restrictive insecticide be necessary to avoid potential chemical resistance development, to be performed when offices remain closed for minimally 24 hours (Friday or Saturday application) with the appropriate posting and notification.

At mid-year (first six months) Company provide summary of information gathered with recommendations for discussion with appropriate personnel.

If any inspection and monitor placement is performed during regular working hours, every precaution will be taken to ensure minimal interruption of regular working routine. It would be advantageous to perform inspections during off hours to minimize interruption, and when bed bugs are likely to be visible since they are nocturnal.

Optionally, Ashland is examining the possibility of obtaining a bed bug sniffing dog with the corresponding training of a dog handling technician to further assist in locating bed bugs in areas not treated for proscribed time frame, and to assist in determining possible sources of bed bugs at anticipated cost of \$395.00 per hour.

Secondarily, in areas where no chemicals or insecticides have been sprayed or treated for minimum of time needed, the subcontracting services of a NESDCA (or similar) trained dog with handler at an additional expense of \$1500 to \$2000 per hour to inspect areas for evidence of bed bugs, optionally available.

Services performed using NYS DEC Certified trained Applicators possessing minimally 5 years experience. As technology advances to provide additional tools or training, company will provide information for County review or incorporation into program.
