(Rev. 9/95)

Maintenance Specifications for: Integrated Security and Access System
Youth Detention Facility
810 East Ferry Street
Buffalo, NY 14211

ARTICLE I GENERAL

- 1001 The services to be performed under contract as per these specifications shall consist of furnishing all materials, labor, tools, and equipment necessary to provide inspection and complete maintenance of the Security/Access equipment herein described. **Full comprehensive service shall include systematic inspections, preventive maintenance to test, inspect, clean, calibrate main panels and all associated equipment, repair and/or replacement of parts for all equipment.**
- 1002 The County reserves the right to terminate (60 day written notice) at any time, for any reason, or suspend any part of the services described herein when conditions change, operation of a county facility is reduced or discontinued or other similar circumstances take place. In the event of such termination or suspension, payments for services shall suspend without penalty.
- 1003 A pre-bid walk through will be scheduled for Thursday, October 31, 2019 at 9:30 am. Please assemble in the lobby of the Youth Detention facility located at 810 East Ferry St, Buffalo, NY 14211.

ARTICLE II COMPETENCY OF BIDDER

- 2001 The bidder shall have had a qualified service organization in active operation for a minimum of ten years. Because of the importance of system uptime and complexity of the entire security system, it is mandatory that bidder meets all requirements within this specification. Any bidders not meeting those requirements will be disqualified from this bid. The bidder shall have an established, security CCTV/security access/industrial controls service agency, capable of performing all work described herein; no portion of this contract shall be subcontracted to others. The bidder shall furnish with their bid, all qualification forms included within this specification. Consideration will not be given to bids submitted by an individual, firm, or corporation who has established on former projects, either governmental or commercial, an unsatisfactory record of performance in connection with inspection or repair of the type of systems specified herein.
- 2002 The bidder shall be responsible for making an initial inspection of the equipment and facility to be serviced, to adequately familiarize themselves with the building. Bidder shall have adequate knowledge of the systems being quoted to provide uninterrupted operation of all equipment. Any omissions or deletions by the bidder shall disqualify the bid.
- 2003 The bidder shall provide adequate workman's compensation and liability insurance coverage acceptable to the Erie County Purchasing Department, as described within this specification. The bidder will need to submit these forms upon notification from Erie County that they are the approved low bidder.

ARTICLE III QUALIFICATIONS OF BIDDERS

- 3001 The successful bidder must furnish at the time of the bid opening, and attached to and made a part of his bid the following:
1. Bidder must submit where they have installed Wonderware at (2) previous locations. Please see the qualifications sheet to be turned in with the bid.
 2. Bidder must provide documentation that they are a systems integrator (SI) for Wonderware. All bidders will be verified through Wonderware training information, certificates of training completion are encouraged and can be attached to bid package. Please see the qualifications input form to be turned in with the bid.

3. Names of (2) full time technicians now on the payroll of the bidder who have a minimum of (10) years' experience in the maintenance and repair of industrial controls. Please see the qualifications input form to be turned in with the bid.
4. Names of (2) full time technicians now on the payroll of the bidder who have a minimum of (10) years' experience in the maintenance and repair of access and CCTV systems. Please see the qualifications input form to be turned in with the bid.
5. References are required. List at least (1) customer within 100 miles who is currently employing the bidder for maintenance services for CCTV, access, industrial controls, paging, and intercom. Please see the qualifications input form to be turned in with the bid.

ARTICLE IV SCOPE OF WORK

- 4001 This invitation to bid assumes the systems covered to be in maintainable condition. If repairs are found necessary upon initial inspection, estimate of repair charges will be submitted for approval. Should these restoration charges be declined, those nonmaintainable items will be eliminated from the program and the agreement price adjusted accordingly. It is the responsibility of the contractor to determine the number of visits required to adequately execute the preventative maintenance tasks. The entire systems shall be checked and maintained comprehensively as described below. Multiple breakdowns because of lack of preventative maintenance visits will result in termination of contract. Testing and maintenance requiring work outside of normal business hours and days are at the option of the vendor at no additional cost to the owner and with permission and coordination of the site engineer.
- 4002 Vendor will be responsible to perform maintenance and testing, lubrication, and calibration on all security/access systems to include: cameras and related hardware and components, access control and all related components including door locking equipment, hardware and software, and intercom system and all related hardware and components. Back-ups of all system software are to be made at each quarterly service. Back-ups are to be maintained onsite and at the vendor's office. All back-up media is to be provided by the vendor. The intent is to test the system once annually through scheduled maintenance visits to thoroughly maintain the system.
- 4003 Access Control System: A visual inspection and operational test of the covered components of the access control system will be performed routinely as to insure that all devices are operating properly. The equipment will also be checked for damage and proper electrical connections. Devices will be exercised to determine proper entry grant or entry denial, verification of door status alarm operation and exist requests, test of controller/terminal communications, operation of standby supplies on battery power and activation of lock hardware to insure capture and release of doors occurs as intended.
- 4004 CCTV System: A visual inspection and operational test of the covered components of the CCTV system will be performed. Contractor will verify transmitted picture quality; inspect cable connections, alignment and seals. Contractor will activate cameras for proper movement and operation, activate controllers and motors for proper response to automatic or manual commands and check the operation of switchers for proper settings and sequencing of inputs. DVR's and other recording devices will be checked for proper speed, settings, picture quality and response to alarm activation.
- 4005 The PLC software shall be backed up quarterly. During each back up, the technician shall perform diagnostic and operational test to ensure proper operation. Available firmware upgrades that fix known bugs and provide for more efficient operation shall be applied at the contractor's expense. Upgrades must be performed by the industrial controls technicians of the certified systems integrator.
- 4006 The HMI software shall be upgraded annually are revisions are released from the factory. Upgrades must be performed by factory trained technicians of the certified systems integrator.
- 4007 The security system has (3) computer workstations. Through the term of this agreement, each workstation, including monitor and keyboard, shall be upgraded with a new computer that meets or exceeds the software recommendations. Refurbished equipment is not acceptable.

4008 Parts repair and replacement provisions apply only to the systems and equipment covered. Vendor will provide repairs to all existing systems due to normal wear and tear and bear all expenses thereof. Repair of non-maintainable parts, shall not be included in this agreement. Known non-maintainable parts include UPS and batteries.

4009 Damages to equipment resulting from accidents, fire, storm, water, negligence by owner or by any reason beyond the contractors control other than fair wear and tear, shall not be the responsibility of the contractor.

4010 Emergency Service shall be provided (24) twenty-four hours a day to minimize down time and inconvenience. All emergencies regardless of the time or day shall be covered within this contract without charge for labor or traveling expenses. If for any reason a system should be out of service for more than the usual inspection or trouble shooting time, the contractor shall notify the Erie County Division of Buildings & Grounds office with the reason why, and what time the system is expected to be put back in service for proper and safe operation.

Contractor shall have service response center with a toll free number for to call in case of an emergency. The service response center shall be manned 24 hours per day. Paging systems and recordings are unacceptable.

Upon notification of an emergency, the contractor technician shall respond online within 2 hours. If the problem cannot be resolved online, the contractor shall be onsite within 3 hours of notification of issue. Therefore, out of area contractors are not acceptable. All aspects of the security system (access/CCTV/intercom/paging/PLC/HMI) must follow the above response times for emergencies and the appropriate technician must be dispatched. Sending a CCTV technician to fix a PLC issue is unacceptable and will result in cancellation of contract.

4011 Documentation: Upon completion of all regular scheduled maintenance and/or emergency services, contractor shall certify in writing that each system is 100% operational. Copies of this report shall be delivered or mailed to Erie County Buildings & Grounds office, also copies maintained by the contractor. The contractor shall have the county onsite engineer sign the work reports prior to leaving the site.

ARTICLE V EQUIPMENT LIST

Video Monitoring System, to include:

Central processing equipment

Video Monitors

Video Cameras and associated mountings, gimbals and directional drive motors

Video Camera pointing devices

Video Recording equipment and associated devices

Door Locking Compressors

Door locking system:

Wonderware software

Omron PLC

Door locking system central processing equipment and software

Central control equipment and touch screen controls

Door locking and door release mechanisms

Door swipe card and proximity readers

Access control and monitoring equipment for overhead garage door openers

Local POD emergency override controllers

Camera Licenses for IP cameras

Network Switch Equipment

Intercom system

Alarm Initiating devices and audible devices (Excluding Fire Alarm System)

ARTICLE VI PAYMENT

Payment for services to be made in quarterly installments in arrears, and upon receipt of invoice.

The yearly cost for service shall be:

For the period January 1, 2020 - December 31, 2020 \$75,800.00

For the period January 1, 2021 - December 31, 2021 \$79,900.00

Cost for any work beyond the scope of the specifications shall be:

Regular Hourly Labor Rate \$140.71

After Hours & Weekend Hourly Labor Rate \$181.88

Holiday Hourly Labor Rate \$223.06

Material to be per NY State Contract Pricing.

Bid will be awarded based on the following formula:

Yearly Cost of 2020 + Yearly Cost of 2021 + 25 hours out-of-scope work at Regular Hourly Labor Rate
