## SPECIFICATIONS

Erie County Sewer District No. 4 (ECSD #4) owns, operates, and maintains a wastewater flow metering system to measure the flows of a 60" diameter pipe near 73 South Pierce Street, Buffalo, NY 14206. The existing system utilizes a HACH FL1500 meter with a Flodar with Surchage Velocity Sensor to measure the flow. This metering system is experiencing issues. As such, ECSD #4 desires metering services for the July 2024 to June 2025 billing cycle.

The existing billing meter is in a manhole at 73 South Pierce Street, West Seneca, New York. A 2024 Meter Evaluation Study completed by Arcadis has shown an upstream manhole near the corner of Casimer Street and Crawford Drive in the same general neighborhood to produce the most accurate data.

The contractor shall:

- Furnish and Install a metering system compatible with the collection system in the Casimer/Crawford manhole from July 1, 2024 to June 30, 2025.
- Maintain the meter to a greater than 90% uptime.
- Make regular monthly reports (electronic files) of the raw level, velocity, and flow data in five-minute logging intervals to ECSD #4 and the Buffalo Sewer Authority.
- Provide any software or account access necessary to access the monthly data.
- Have a minimum of five years' experience working with flow metering equipment.
- Provide to ECSD #4 a signed, notarized, and dated copy of the Confined Space Program Certification

The meter shall:

- Utilize an area velocity sensor.
- Log level, velocity, and flow in five-minute intervals.
