GASOLINE
BID SPECIFICATIONS

All vehicles delivering gasoline shall be equipped with accurate printing type flow meters registering the gallonage being delivered.

11. Successful vendors shall maintain sufficient gasoline on hand to meet all of awarded requirements.
12. Quality: Contractor will be required to assume full responsibility for the quality of the gasoline furnished. If any gasoline is supplied which proves unsatisfactory in use, or an analysis shows it does not meet Specifications, contractor will be required to remove the gasoline and supply gasoline of a proper quality. In default thereof, the County may purchase same in the open market at the contractor's expense and Deduction in price made for consumed gasoline.
13. Cancellation: Contract entered into under the terms of these specifications may be canceled by the County, If, after analysis and practical test of such duration as may be decided by the County, it is determined that Gasoline is not being supplied in accordance with the specifications, or if through fault of the contractor, Delivered are not made when ordered by the County, causing a shortage of Gasoline to the County. If contract is canceled, the County may purchase proper oil in the open market and any additional cost to. The County through such action will be charged to the contractor.
14. The County, may, at its sole option, add additional locations as required, at pure levels consistent with the prices quoted herein.
15. Please note there are five locations that are highlighted in the bid specifications. These specific locations are being considered to be used as "Temporary standby storage tanks", in an attempt to achieve a 20% reduction of fueling sites.
16. It is the responsibility of the successful vendor to perform proper clean up of any petroleum product which is spilled as a result of tank refueling, including spillage to the ground's surface and/or spillage into fuel tank "catch basins" or other secondary containment devices.
