?

What is

?

Live Well Erie is a **VISION** to help every resident of Erie County achieve his or her full potential. It uses five **guiding principles** to focus on nine **broad goals** across three populations: children, working families, and seniors. One of the guiding principles is to maintain a clear focus on the **social determinants of health** - things like neighborhood resources, school quality, workplace safety, clean food, air and water, and social relationships, which are all critical factors that contribute to the overall health and well-being of individuals in a community.

With over 150 county and community partners, we are proud of the work we are all doing collaboratively across the communities in Erie County
